Summary

Mobile Software Engineer and recent engineering graduate (B.E. in AI & ML, 2026) specializing in cross-platform native mobile application development for iOS and Android using Swift, SwiftUI, Kotlin, and Jetpack Compose. Experienced in implementing pixel-perfect user interfaces, managing state workflows, and building robust application architectures.

Skills

Mobile Ecosystem Frameworks: Swift, SwiftUI, iOS, macOS, Kotlin, Jetpack Compose, Android SDK, Mobile UI/UX Design, Human Interface Guidelines

Tools Collaboration: Git/GitHub, Xcode, Android Studio, REST APIs, CI/CD, Code Reviews, Unit Testing, Agile Development

Core Foundations: Computer Science, Software Development Life Cycle (SDLC), Cross-Platform Architecture, Problem Solving

Professional Experience

MindMatrix – Software Engineering Intern

Feb 2026 – May 2026

Bengaluru, India

- Developed, tested, and maintained Python-based applications, scripts, and REST APIs to support commercial software workflows.
- Participated actively in coding, debugging, troubleshooting, and code reviews, maintaining coding standards and reducing manual data entry by 40%.
- Supported automation and process improvement initiatives, utilizing Object-Oriented Programming principles to optimize backend logic and cut API latency by 25%.
- Collaborated with cross-functional teams to understand requirements, prepare technical documentation, and deliver project updates.

Headstarter AI – Software Engineering Fellow

Jul 2024 – Sep 2024

Remote

- Designed and delivered 5 production-grade applications within an agile software development life cycle (SDLC) framework.
- Implemented Git version control workflows, automated CI/CD deployment pipelines, and database integration scripts using Python and SQL.
- Monitored system telemetry, performed debugging, and built data processing analytics solutions to track performance metrics.
- Communicated project updates clearly through technical documentation and collaborative team discussions.

Projects

NEXA – Autonomous AI Agent Task Automation Platform

2025 – 2026

- Architected a stateful multimodal AI agent platform featuring multi-turn execution loops, memory management, tool calling, and sub-500ms response latencies using LangChain and LLM APIs.
- Implemented evaluation and regression testing infrastructure to validate agent behavior and ensure high production reliability.

PhytoFusion – Plant Disease Detection AI Diagnostics Tool

2026

- Engineered a machine learning diagnostic service utilizing Python, PyTorch, and TensorFlow, achieving 89% validation accuracy across complex analytical categories.
- Built scalable backend APIs and data processing pipelines to handle high-volume operational datasets with strict performance efficiency.

Leadership Achievements

- Core Technical Lead, GDG on Campus AWS Cloud Club** – Mentored 200+ students on mobile development, software design patterns, and collaborative teamwork.
- 1st Place, Hack a City 2.0 National Hackathon** – Outperformed 50+ teams by rapidly designing, building, and deploying a secure, high-performance system under tight deadlines.

Education

City Engineering College (VTU)

Bengaluru, India

Bachelor of Engineering in Artificial Intelligence & Machine Learning

Graduated May 2026

Relevant Coursework: Mobile Application Development, Object-Oriented Programming, Data Structures & Algorithms, Database Management Systems, Software Engineering

Certifications

NASA Open Science – Transform to Open Science (TOPS) Certification • GitHub Foundations / GitHub Education Certified • AI Foundations – Ethics, Governance Prompting (PoliSync)
